Education

Webster University
Webster Groves, MO

B.S. Computer Science
Minor in Website Development
Graduated May 2016, 3.8 GPA

Tech Skills

Expert:

- React
- React Native
- Javascript
- Typescript
- CSS
- HTML
- Git

Intermediate:

- Testing libraries (Jest, RTL, and Jasmine)
- Flux libraries (Redux and NgRx)
- Angular
- Node web frameworks (Express, Gatsby, Nexus, Next, and Nest)
- GraphQL
- Postgres
- Mongo
- Sequelize
- Component libraries (MUI, Chakra, and Bootstrap)

Beginner:

- AWS
- Infrastructure as code tools (Terraform and Serverless)

Key Professional Experience

Senior Software Engineer

Vivian Health | Remote | Full-time | Dec 2021 – Present

- Currently work on the mobile team, responsible for development and infrastructure around the company's native Android and iOS app.
- Serve as the team's release engineer, leading the mobile release process and our team ceremonies (stand-up, retro, planning, regression testing, etc.)
- Help maintain our web app and the API that our native apps and web app rely on.
- Utilize React Native with Typescript (to build our native apps); Next.js (for our web app to render server-side); and Express, Sequelize, Postgres, and Algolia (for API).

Senior Software Engineer

Charter Communications | Denver, CO | Contractor | Feb 2021 – Dec 2021

- Worked on Charter's internal testing application, Photon, which all teams at Charter use for regression testing with E2E automated and manual tests. Photon also provides our users with comprehensive reporting.
- Utilized tools including React, Nexus, Typescript, AWS, Mongo, and GraphQL.

Senior Software Engineer

Bayer | St. Louis, MO | Contractor | Sep 2019 – Feb 2021

- Worked on a project that pilots various business models that have potential for disrupting the agriculture and climate industry.
- Leveraged AWS Lambdas with Serverless Framework for back-end and React for front-end.

Senior Software Engineer

Wells Fargo Advisors | St. Louis, MO | Contractor | Mar 2019 – Sep 2019

- Worked as part of a team to complete feature work on an internal project in which our goal was to port all of the company's various legacy apps into a single app on a modern stack.
- Worked primarily with Angular, Typescript, RxJS, NgRx, D3, Less, and Bootstrap.

Mid-Level Software Engineer

Bullhorn | Clayton, MO | Full-time | Nov 2017 – Mar 2019

- Maintained and created new functionality for the company's premiere Applicant Tracking System (ATS) / Candidate Relationship Management (CRM) offering, which allows users to streamline their employee recruitment process.
- Focused on front-end development, pushing changes to the latest iteration of the ATS/CRM platform, which was always on the latest release of Angular and leverages Typescript, Jest, Protractor, and Sass.
- Collaborated with other developers to revamp the legacy admin app to be a modern Angular and node (Nest) app.
- Contributed to the company's open-source components library, namely Novo Elements and Taurus.
